FAO and SLU collaboration

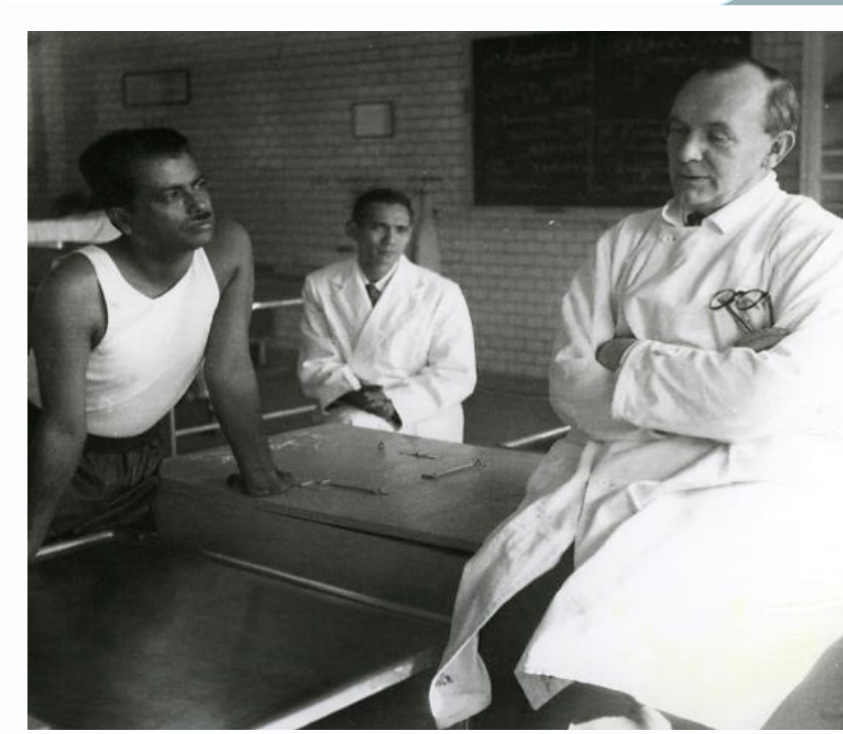

A selection of a diverse and extensive co-operation in a wide range of areas relating to agriculture, land and water resources management, animal production and health, and forestry and agro-silvopastoral systems.

SLU researchers often contribute actively as authors to FAO publications. In addition, FAO often cites SLU research in its reports. For example, in 2021, FAO reports made over 200 references to scientific papers published by SLU researchers. Source: SLU Library

Research categories for copublications with FAO (2014-2023), according to Web of Science (number of articles per category). Source: SLU Library
